

Water Conservation Plan

SUSTAINABLE DEVELOPMENT GOALS

Water Conservation Plan

Tiger Motors Sdn Bhd is committed to responsible water management as part of our environmental stewardship in Kuching, Sarawak. This plan outlines our approach to water conservation, management, and sustainability initiatives.

1 Current Water Usage Assessment

- Car washing operations
- Facility maintenance and cleaning
- Employee usage (toilets, pantry, etc.)
- Landscaping and outdoor maintenance

2 Water Conservation Goals

Target: Reduce water consumption by 50% by 2030 through:

- Installation of water-efficient car washing systems
- Implementation of rainwater harvesting systems
- Regular maintenance to prevent leaks
- Employee training on water conservation practices

3 Implementation Strategies

3.1 Car Washing Operations

- Install water recycling systems for car wash operations
- Use high-pressure, low-volume cleaning equipment
- Implement water-efficient washing techniques
- Regular maintenance of water systems to prevent wastage

3.2 Facility Management

- Install water-efficient fixtures in toilets and pantry
- Implement sensor-based taps in washrooms
- Regular monitoring of water usage patterns
- Prompt repair of leaks and maintenance issues

3.3 Rainwater Harvesting

- Install rainwater collection systems
- Use collected rainwater for:
 - Car washing
 - Landscape irrigation
 - General cleaning

4 Monitoring and Reporting

- Monthly water consumption tracking
- Quarterly performance reviews
- Annual sustainability report publication
- Regular updates to stakeholders

5 Employee Engagement

We will engage our employees through:

- Regular training sessions on water conservation
- Awareness campaigns
- Recognition of water-saving initiatives
- Clear communication of goals and progress

6 Compliance and Certification

- Adherence to Sarawak water management regulations
- Regular audits of water management systems
- Pursuit of relevant environmental certifications

7 Emergency Response

Procedures for:

- Water supply disruptions
- Leak detection and repair
- Contamination prevention
- Emergency communication protocols

8 Budget and Resources

Annual allocation for:

- Infrastructure improvements
- Maintenance and repairs
- Training and awareness programs
- Monitoring and reporting systems

9 Review and Updates

This plan will be:

- Reviewed quarterly
- Updated annually
- Adjusted based on performance metrics
- Aligned with evolving ESG standards

By implementing this Water Management plan, Tiger Motors Sdn Bhd aims to reduce our environmental impact, lower operational costs, and position ourselves as a leader in sustainable business practices in the used car industry in Kuching, Sarawak.
