NEXT REVIEW

October 2027

1. Purpose

Tiger Motors Sdn Bhd minimises the waste it produces and disposes of what remains responsibly, in line with the Environmental Quality Act 1974, the Environmental Quality (Scheduled Wastes) Regulations 2005 and Sarawak's environmental requirements.

2. Targets

- 30% reduction in waste generated by 2030.
- Zero used engine oil to landfill.

3. Reduce

- Paperless ERP system for sales, inspections and loans; printing only when required.
- Careful use of parts and materials during refurbishment.
- Environmentally safe cleaning products for detailing.

4. Reuse and recycle

- Waste separated by material type (paper, plastic, metal, glass).
- Reusable items resold at low cost; proceeds go to staff welfare and donations.
- Tyres, batteries and metal parts sent to recyclers.

5. Scheduled and hazardous waste

- Used engine oil, oily rags, filters and batteries are labelled, stored safely and collected by licensed contractors, with records kept.
- Our panel workshops send used engine oil for proper second-life treatment.

6. People and customers

Staff are trained on waste sorting and handling. We share advice with customers on keeping vehicles longer through proper maintenance.

7. Monitoring and review

Waste and recycling are tracked in our ERP system and reported on our ESG page. This policy is reviewed every year.
